In the name of Allah, Most Gracious, Most Merciful

Asalam - O - Alaikum,

To whom it may concern

After Allah undoubtedly, Mr. Hassan Sohaib Murad was gracious and most merciful for me.

I was the student of Electrical Engineering in UMT. my batch is from 2009-2013. I belongs from a mediocre class family in Bahawalpur. I took admission in UMT in 2009. (My father is a landlord and that was the only way of earning for my family at that time. And as you know that, there is always an uncertainty for the farmer's earning in a whole life.)

My father manages very hard for my admission because that time my admission fees and tuition fees was almost equal with whole of our earnings. But, he creates some other source of earning for my study in UMT by doing investments in small businesses. But unfortunately, right after my admission we had a set back from that businesses, we had a great loss in all our investments.

Then, for me at that time it was impossible to continue my study in electrical engineering. My father asked me to discontinue and return back. But, I was ambitious to continue because being engineer was the childhood dream for me and my family .

I also had no option other than discontinue my degree and return back to home and helps my father in farming. But, at that time I heard something about Financial Aid (Need base scholarship) which was given by the institution for the needy students.

That was the only hope I had and my last option to continue my studies. I applied for this scholarship but experiences some difficulties in it because the committee requires proof of everything (including loss in business). I managed to get some basic documentations but the proof of business loss wasn't available.

I came in front of the committee (Mr. Hassan Sohaib Murad was also the member of that committee) who was responsible to grant that Aid. They looked at all my documents and acquired about the most desiring document for the aid that was the proof of loss that I wasn't had.

I once again got depressed because they clearly asked me if you are not able to show that document you will not have that aid. Mr Murad asked the team please grant him because he is looking like that he is saying a truth.

After one week I received an email granting me the 40% scholarship on the need base. I became very happy I cant tell that feelings in a words. This was only by the mercy of ALLAH Almighty and Dr. Hassan Sohaib Murad.

I quickly called to my family and told all that story, they also got too much happy because we can manage to pay other 60% more comfortably.

I understand that this is the qarz which we have to return.

Now, I am an Electrical Engineer working in a UK based construction consultancy firm as an International team coordinator and very well settled in my life Allhamdullilah.

(In my job responsibilities I designed electricity and electrical equipment for many Royal houses, plazas and other small and medium sizes homes and business places in England and wales.)

This all that is due to the approval of need base scholarship by Mr. Sohaib Murad and I shall never forget his mercy upon me.

May ALLAH Almighty grant him a higher rank in Jannah with Muhammad (P.B.U.H).
Ameen Sum Ameen.

Kind Regards

Muhammad Aqeel
